CROCHET STYLE

That rhythm of making stitch after
stitch is like deep breathing

Even a simple knitting or crochet
pattern requires attentiveness to
ensure that each stitch is made
correctly.

JACQUARD STRUCTURE

In knitted fabrics, the jacquard weave plays an important role. The special texture and visual effects make the knitted fabrics richer in layers and have a vivid, three-dimensional and natural beauty.

The color pattern, weave structure and the choice of yarn material in the jacquard weave determine the final style and visual effect of the knitted fabric.

NATURAL / THREE-DIMENSIONAL / VIVID

LEOPARD JACQUARD

An Independent, Pure And Never-fading Popular Element

Newtex

The leopard pattern is spiral, formed by a large number of irregular dots and strips, with similar but different shapes. The dots are sometimes evacuated and sometimes dense, and the arrangement reveals a sense of freedom and laziness, giving people a visual experience of uninhibited and wildness. Coupled with the wild and aggressive nature of the cheetah itself, the publicity of the leopard pattern is vividly reflected.

Our leopard jacquard collection combines textures, colors, and styles to give you a captivating look while embodying feminine structures. With an iconic pattern, it is the highlight of this collection.

FEATHER YARN

WHICH AVOIDS THE EASY PILLING OF SWEATERS AND GIVES THE CLOTHING A SOFT AND DYNAMIC EFFECT.

FEATHER YARN:

According to the process requirements, it is cut at equal intervals after being formed into a circle. The cut decorative yarn is fixed by the core yarn coil and will not fall off. So, the feathers are arranged in a certain direction and formed around the core yarn. Due to the directional distribution of feathers, the resulting coat has a soft luster, and warmth, and is not easy to shed.

WINTER FASHION

BOILED WOOL:

Wool itself is an impressive natural material with great properties right from the start. By boiling wool, it shrinks, so when it's made into a coat, it doesn't let the wind in or let your heat out, making it warmer than regular wool.

RWS WOOL

THE RWS (Responsible Wool Standard)

Hedda Solid Long Wool Coat

BOILED WOOL COAT/JACKET

Long sleeves drape over the shoulders, classic lapels, and a boxy fit that is cut for a looser fit further enhances this elegant design.

After special washing treatment, the gap between the coils is closed, making the pattern more stiff and neat, enhancing the elasticity and warmth of the wool, and making the hand feel richer and softer.

HEDDA SOLID
/
Short Wool Coat

The cropped version has a stand collar and dropped shoulders, and a large front welt pocket creates a relaxed silhouette, and a metal zipper under the wide front adds a minimalist feel.

WOMEN'S COAT

DOUBLE FACE WOOLLEN COATS

Double-faced woolen fabric does not have the bloated shape of down jackets, and is easier to wear with a sense of silhouette. The combination with women's ready-to-wear is not only because of its warmth retention, but also meets women's pursuit of light clothing and maintaining a slim figure in cold winter demand.
